Maxim Sukhetsky

FRONTEND ENGINEER | REACT · TYPESCRIPT · JAVASCRIPT · MICRO FRONTENDS

Frontend Engineer with 5 years of commercial experience building web applications with React, TypeScript, and JavaScript. Experienced in developing scalable interfaces, reusable components, complex data-driven features, and Micro Frontends with Webpack Module Federation. Take ownership of frontend features from requirements and technical planning through implementation, backend integration, testing, and production release. Experienced in performance optimization, state management, API integration, and working closely with backend developers, QA engineers, designers, and other teams.

LOCATION

Kyiv, Ukraine

LANGUAGES

English - Intermediate

Ukrainian - Native

EDUCATION

Kyiv National University of Economics

Bachelor's Degree in Information Technology in Economics
Kyiv 2018 - 2020

Kyiv College of Information Systems and Technologies

Junior Specialist in Computer Science
Kyiv 2014-2018

COURSES

Hillel IT School
AI-Assisted Development (Claude code)
Remote 2026

DAN IT
Frontend Development Course
Kyiv 2020-2021

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+)

Web Technologies & UI: React, React Hooks, React Router, HTML5, CSS3, SCSS, LESS, CSS Modules, BEM, i18n

State Management: Redux, Redux Toolkit, MobX

Architecture: Micro Frontends (Webpack Module Federation)

API & Data: REST API, GraphQL, RTK Query, Axios

Forms: React Hook Form, Formik

Build & Development: Git, GitHub, GitLab, Webpack, Vite, Gulp, npm, pnpm, yarn, Chrome DevTools

Testing & Code Quality: Jest, ESLint, Stylelint, Prettier

Principles: OOP, SOLID, DRY, KISS, YAGNI

AI Tools: Cursor, Claude Code

WORK EXPERIENCE

SEARATES | April 2023 – August 2026

Frontend Developer

- Developed and maintained customer-facing and internal web applications for logistics and supply chain workflows using React and TypeScript.
- Prepared applications for Micro Frontend integration using Webpack Module Federation, defined integration contracts and configuration through props, and documented integration guidelines for other teams.
- Developed a Freight Index interface with advanced filters, region autocomplete, and subscription-based features.
- Built a full-screen calendar from scratch using a custom data model and list virtualization to improve scrolling performance and reduce unnecessary re-renders.
- Optimized data loading in a scheduling application by progressively displaying initial results while loading remaining data in the background, reducing initial loading time from 40–50 seconds to approximately 10 seconds.
- Increased Jest unit test coverage of an authorization application integrated with 10+ other applications to approximately 90%, helping prevent regressions.
- Implemented role-based access and tailored interfaces for different user roles.
- Took ownership of frontend features from requirements and technical planning through implementation, backend integration, testing, and production release, collaborating with backend developers, QA engineers, designers, and other teams.

GENESIS | September 2019 - February 2023

Frontend Developer, January 2022– February 2023

- Developed an HTML email editor with reusable React components and rich editing functionality.
- Built data tables for displaying and managing email campaigns using Redux and Semantic UI React.
- Built complex forms with React Hook Form and integrated frontend applications with REST APIs.
- Developed LinkedIn data parsers using Selenium and Cheerio, including proxy and user-agent rotation.

HTML Coder, September 2019 - January 2022

- Developed responsive landing pages and HTML email templates, ensuring cross-browser and email client compatibility.
- Maintained and optimized existing email templates, resolving rendering and production issues.
- Conducted technical interviews for HTML Developer and trainee positions and mentored new team members through onboarding, code reviews, and technical guidance.

AURORA TECHNOLOGIES | August 2018 - August 2019

HTML Coder

- Developed and maintained responsive HTML email templates.
- Maintained and improved existing email campaigns, resolving markup and issues.
